

Accu-Steel

BUILT AROUND

**SALT &
SAND**

READY FOR ANYTHING

**A smarter, more efficient storage solution
for municipalities and public works.**

FABRIC-COVERED BUILDINGS

BUILT AROUND WHAT MATTERS THE MOST.

DURABILITY. COMMUNITY. TRUST.

Accu-Steel fabric covered buildings are engineered to help municipalities, state roads, and maintenance groups provide maximum value—without cutting corners. From corrosion resistance to procurement simplicity, we've thought of everything (so you don't have to).

PROTECT YOUR MATERIALS. AND THE ENVIRONMENT.

Salt and sand losses from runoff and contamination can cost municipalities up to 20% annually—not to mention compliance risks.

Prevent runoff and contamination. Avoid fines.
Help protect groundwater, wetlands, and surrounding communities.

Plan for your weather
All our buildings are engineered to your specific wind and snow load ratings.

Comply with environmental regulations
Designed to support EPA and local stormwater control standards.

Preserve product quality
Our Enduro-Loc™ Fabric prevents moisture buildup and spoilage.

Hot-dipped galvanization
In highly corrosive environments, post-production hot-dipped galvanized steel offers superior corrosion resistance.

VERSATILE DESIGN. PROVEN PERFORMANCE.

Flexible by design
We meet any spec and work with you to create a structure that fits your operation—not the other way around.

Multiple foundation options and clear-span interiors
Designed for maximum storage capacity within the footprint you need.

Quick permitting process
With Sourcewell and a dedicated team, you can get your materials under cover sooner.

Profiles that fit your operation's needs
Our Integrity, Advantage, and Crossover series are ideal across facility sizes and applications.
