Enduro-Loc™ Cover Colors

*Also available in Clear (64130015) and Fire Retardant in White, Green, and Tan/Beige only

Little details. Big difference. We proudly manufacture all our products at our facility outside of Templeton, Iowa. That's how we're able to produce the highest quality fabric-covered buildings at the lowest cost to you. At Accu-Steel, we work hard to make sure every component is quality-constructed for optimum performance. No cutting corners. No compromises.

Built with Integrity

Gabled Storage Solutions

Accu-Steel's Integrity buildings are the ideal storage solution. Whether it's equipment, sand, salt, fertilizer, other inventory or livestock - the Integrity Series has you covered. Accu-Steel buildings are designed to your specifications and engineered to your local codes. Manufactured using high quality, non-corrosive materials and finishes, an Accu-Steel building offers the longest and most comprehensive warranty in the industry.

New Design - Same Great Product

Integrity buildings offer a unique storage solution for any industry. The soft peaked trusses and higher sidewalls create an aesthetically pleasing, traditional shape. The Integrity profile allows for greater clearance within the barrier-free interior and our Enduro-Loc™ fabric filter natural light while protecting everything housed inside. We hot-dip galvanize all the steel we manufacture in our facility that is located outside of Templeton, Iowa.

All-Purpose

Integrity buildings can be utilized in a multitude of industries on a variety of foundations. The recommended widths for standard and high profile trusses are 46' through 75' and 97' through 130'. If you are looking for a building over 130', check out our Crossover series. The Integrity series allows you to truly customize your operation, without the custom price.

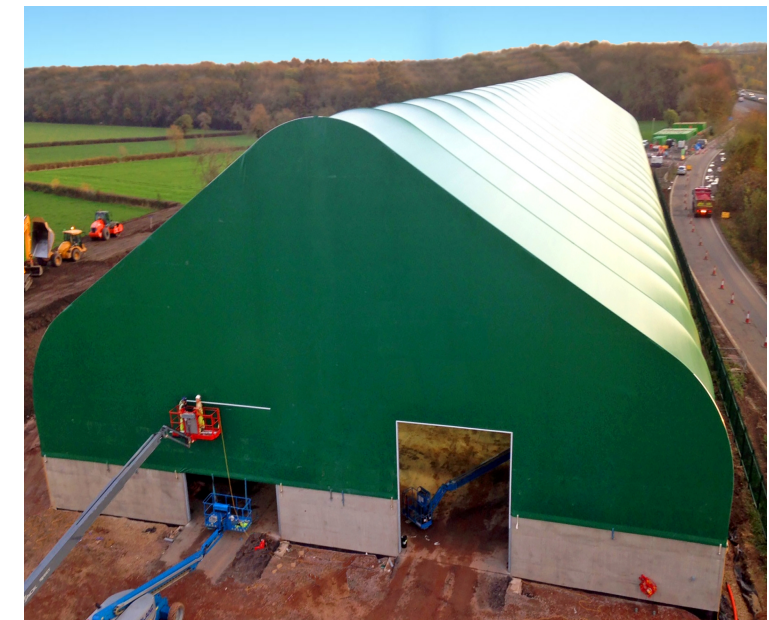

This building series is the perfect addition to any industry including sand and salt storage, livestock, hay storage, equestrian, equipment storage, mining, cattle, grain storage, retail, recreational, aviation, fertilizer storage, and municipalities.

See our cattle brochure or contact us to learn more about our new line of Cattle Integrity buildings.

Accu-Steel's Commitment

We have been designing hoop buildings since 2001. We continue to research and develop our products to provide you with the best, most budget friendly buildings possible. The Integrity series is truly customizable and affordable. This building line is able to accommodate virtually any width and length. We are committed to providing you with the best products available for your operation. Our staff is dedicated to providing you with an exceptional level of service and support.

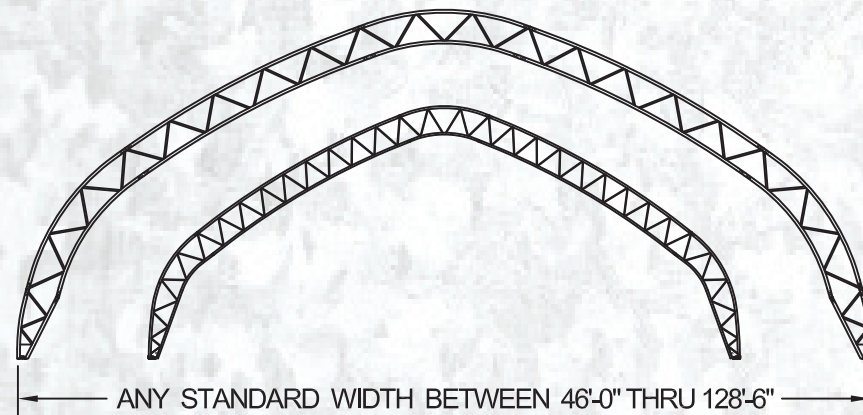

Peak Performance

- Greater height and more clearance create a larger capacity for storage and equipment operation
- The peaked roof and protective, smooth top coat of the cover sheds water and self cleans. Our Enduro-Loc™ fabric does not leak and prevents condensation
- Hot-dip galvanized steel and optional stainless steel package hinders corrosion - even in highly corrosive environments
- Flexible design to accommodate site restrictions and existing foundations
- Ability to add endwalls and doors to completely protect your investment within the building
