

EXPAND YOUR SALES POTENTIAL

Don't lose a sale by not offering fabric-covered buildings.

If you have a quality construction crew and are looking to grow your business, become an Accu-Steel installer and increase your sales potential! Win more jobs by offering specialty fabric-covered buildings that resist corrosion and provide abundant natural light. Our quality products, innovative technology, industry knowledge, and family values make Accu-Steel a great choice for expanding your product line – and your bottom line.

Our fabric-covered buildings are ideal for a variety of industries, including:

- Cattle
- Industrial
- Agricultural
- Fertilizer
- Salt, sand, and de-icing
- Recreational
- Mining: oil, gas, and aggregate
- Military and aviation
- Grain and commodity
- Green solutions

“The support and attention to detail I receive from Accu-Steel is awesome. Their buildings always arrive complete and on time — which means more money in my pocket.”

Vincent Glassmaker, Accu-Steel installer

Why customers choose fabric-covered buildings

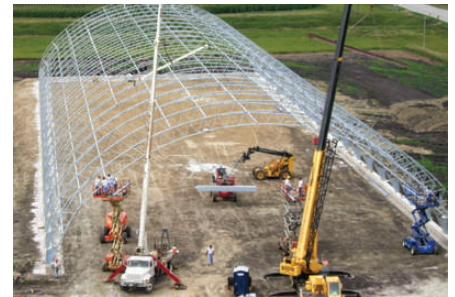

With a fabric-covered building offering you can provide customers solutions that are quick and easy to install. Customers request fabric-covered buildings because they're versatile in design and easier to customize for unique applications. Best of all, fabric-covered buildings allow for better regulation of critical interior conditions such as light, air flow, temperature and moisture — and provide customers with the clear-span space and corrosion protection other buildings simply can't offer.

Why you should partner with Accu-Steel

We provide the highest quality products at the lowest cost of ownership. Our innovative designs will help your customers maximize land use, improve production, and reduce costs. While each building can be customized, all of our buildings feature the following:

- **Engineering and certification** — Designed to the highest engineering standards and built in the USA
- **Versatility and flexibility** — Variety of shapes, sizes, styles, accessories, and classic colors available
- **Service and 20-year warranty** — Responsive support and exceptional warranty that covers steel and fabric

It's our business to help you with your business, so rest assured that we'll never try to take your customers away from you. In fact, we consider you a valuable customer, and will treat you as such. We're never more than a phone call away when you need personalized customer service, and we can offer you the benefits of factory-direct pricing.

“After working with other fabric-covered building suppliers, I really appreciate Accu-Steel's commitment to quality and customer service. I can trust them to always do the right thing.”

Michael Christianson, Accu-Steel installer

THE BOTTOM LINE

- Factory-direct pricing gives you a better profit margin on products.
- All components arrive together so you can meet deadlines, get paid, and keep on schedule.
- Easy installation lets you complete more projects more quickly for more money.
- Quality construction means fewer expensive callbacks and fewer headaches.
